Project SAFeR (Safety and Family Resiliency) assists families dealing with childhood problematic sexual behaviors (PSBs).

Problematic sexual behavior is that which goes beyond what is normal sexual development for a child's age. It usually involves activity between children who are quite a bit different in age or who are not considered equals due to maturity, size, or other factors.

Project SAFeR provides assessment, education, and treatment planning, utilizing a comprehensive family-centered approach to serve both children and their parents/guardians.
